

BitcoinX is a peer-to-peer decentralized network with a strong team and network which aims to dominate the cryptocurrency world. We in BitcoinX have integrated cutting edge technology called Proof-Of-Stake to devise a cryptocurrency that would have a real life usage.

BitcoinX is perfectionised to be used as a reliable cryptocurrency that can be integrated into payment gateways. It is decentralized, secure and fast. BitcoinX [BTCX] is designed specifically to become a leader in the cryptocurrency world. Our aim is to be an integral part of future gateways and peer-to-peer transactions. Unlike many other cryptocurrencies out there, BTCX has flawless technology which maintains privacy and enables super fast transactions which will be suitable for online business.

With supply of 90 Billion BTCX, we aim to dominate the cryptocurrency gateways by Q4 2018.

We have used proof of stake which is unique unlike proof of work which required GPU mining this simply needs you to stake your coins to receive rewards.

Proof of Stake currencies can be several thousand times more cost effective than Proof of Work; which relies on energy use According to a bitcoin mining-farm operator, energy consumption totaled 240kWh per bitcoin in 2014 (equivalent to combusting 16 gallons of gasoline, in terms of carbon production). Significant advantages of PoS include security, reduced risk of centralization, and energy efficiency.

Why is BitcoinX created and its purpose

BitcoinX is created to make cryptocurrency tasks easier and have a group of people solving problems as the main theme of BitcoinX relies on its unique nature of working.

BitcoinX believes that one of the greatest benefits of a cryptocurrency organization is the positive and progressive attitude that seems to radiate and highlight it. Each member of the team contributes their fair share of the workload and which they would fully understand their responsibilities Apart from usual rewards members would be given special task to complete to achieve higher rewards.

BitcoinX encourages teamwork understands the power of recognition and rewards to motivate team who embrace the idea of working as a group to accomplish a common goal.

Higher productivity is one indication that BitcoinX organization encourages. When individuals feel as if they play a key part in the success of an organization, they can approach each task with a higher sense of accountability, and strive to present their best work. When colleagues see people around them working together they would want to indulge into new cryptocurrency technology.

BitcoinX will heavily aim at campaigns, promotions through various websites to increase its popularity. Besides boosting profits, BitcoinX organizations often will choose one of the special team members to maintain the campaigns.

BitcoinX is meant for everyone every member can contribute to the network which could be almost anything and every contribution leads a good reward for the network members of BitcoinX. Members would have a communicating platform called DISCORD where each member posts their views for the future of BitcoinX and it's considered by the group of BitcoinX members to implement it or not. BitcoinX is solely dependent on the community to decide whether they like the certain points or not. Rewards are based on how important the view point of the certain member is and which also depends on the user's marketing techniques every member gets the chance to keep their points on the table. Members can in fact consider ideas and implement it in their own way to make a milestone ahead. We don't believe to form a company but believe in making a team work possible to make a task successful. Tasks are merely marketing or as simple as supporting the discord group but this should not be mistaken with the MLM schemes this is just to get the cryptocurrency to a level where it can see success. We dislike the formation of the company and their techniques but believe in a friendly group of users where we can discuss the outcome of BitcoinX future.

BitcoinX teamwork is a communication tool that reinforces and rewards the most important outcomes that people create for the network. Incentives in form of POS mining can be considered an investment rather than an expense, as companies typically see a huge growth in productivity.

Apart from the proof of stake reward there would be special rewards for teamwork which they can create the momentum for individuals to work together to find solutions the rewards would be higher depending on how much effort they put for promotions. In many cases, BitcoinX will utilize strengths among the group to implement strategies that will result in better overall performance. We will share future plans to the team that can be helpful to everyone.

Great Communication,
Great Team

Don't wait for the establishment of a formal rewards program! Much can be done for almost free the twitter and facebook campaign will also reward you. In near future we will introduce various modes of reward system to make BitcoinX more exiting for everyone. If any members feels rewards are less worth they can demand more as well which will also be decided by the community if the member is more deserving.

Share experiences with your friends and colleagues send this white paper to them and you can also get BitcoinX Coins as reward for advertising . Advertising on BitcoinX can be in various forms. Nobody is rejected from rewards We welcome team members to come and enjoy the future of digital money. When granting rewards for great teamwork, you are acknowledging the team's ability to perform as a group Because not every team member contributes at the same level and if all that gets rewarded in "the team" then each member's performance slides towards the average. exceptional individual contribution is recognized in front of the rest of the team, the team's overall performance is pulled towards the best.

Rewards and recognition will help the BitcoinX team which they will get from their work which is a win-win situation . Gift yourselves BitcoinX. Become this year a proud member of BitcoinX Team.

BitcoinX Recognizes everyone as a team member who is contributing little of their time to promote Bitcoinx as simple as on facebook , Twitter Or any social media platform.

The team creates an environment in which people are comfortable taking reasonable risks in communicating, advocating positions, and taking action. BitcoinX Team members trust must each other. Team members are not denied for disagreeing; disagreement is expected and appreciated BitcoinX is open to any frustration or doubts anyone has. Make sure you're listening to fellow BitcoinX team members and actually considering their thoughts before offering your own solutions and input.

BitcoinX Team are viewed as unique people with irreplaceable experiences, points of view, knowledge, and opinions to contribute. After all, the purpose of forming a team is to take advantage of the differences. Otherwise, why would any organization approach projects, products, or goals with a team? In fact, the more that a team can bring out divergent points of view, that are thoughtfully presented and supported with facts as well as opinions, the better.

BitcoinX team signifies togetherness. As a unified unit, it should work on a common platform. It is advisable for organizations to take initiatives and organize team building exercises, excursions and talk on daily basis to strengthen team bonding which would be on bitcointalk.org. With time team members would have a strong sense of belonging to the group when they experience deep commitment to the group's decisions and actions this sense of belonging will be enhanced and reinforced when the team spends the time to develop team norms and relationship guidelines together.

BitcoinX team understands the goals and is committed to attaining them. This clear direction and agreement on mission and purpose is essential for effective teamwork. Team members must

have an overall mission that is agreed upon and that provides the umbrella for all that the team tries to do. This team clarity is reinforced when the organization has clear expectations for the team's work, goals, accountability, and outcomes.

In BitcoinX Team Creativity, innovation, and different viewpoints are expected and encouraged. Comments such as, "we already tried that and it didn't work" and "what a dumb idea" are not allowed or supported. The team members recognize that the strength in having a team is that every member brings diverseness to the effort to solve a problem, improve a process, reach a goal, or create something new and exciting. It is mandatory to resolve conflicts within the team. Even critical issues, when dealt with maturity, can be resolved easily without leaving a scar. Differences in opinion should not come in the way of the team's performance. Remember that there is no such thing as a stupid idea In BitcoinX.

Respect: To work in coordination, it is essential to understand and respect others in the team.

Respect for each other's competencies, views and actions will minimize conflicts, ensure smooth functioning and enhance productivity. These are often learning opportunities. Opposite opinions should be dealt with respectfully and carefully to ensure everyone is happy and innovation is maximized.

Communication should be open, honest, and respectful. People can feel free to express their thoughts, opinions, and potential solutions to problems on the network. Everyone is heard out and listened to by team members who are attempting to understand. Team members can ask questions for clarity and spend their thought time rather than forming rebuttals

Encourage information sharing, and huddles between BitcoinX team. Members shouldn't have to wait for a catch-up to say hello on bitcointalk.com to get together.

Members of the BitcoinX team would make high quality decisions together and have the support and commitment of the group to carry out the decisions made. They would also gain the support and commitment for the ideas they bring in order to accomplish and communicate the team's progress and success of BitcoinX.

There is immense power when a group of people with similar interests gets together to work toward the same goal. BitcoinX will aim for more productive and committed members who really care about the success and the work of BitcoinX Community.

Avoiding negativity: Shun feelings of negativity, jealousy or ill-will. Do not participate in unproductive or unhealthy discussions. Each team member, through his work, should set an example for others to follow.

As Einstein famously said, "Nothing happens until something moves."
